- A. Sheet Numbering - Sheet numbers appear in the upper-right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between existing sheets with whole numbers, a decimal is added. For example, a new sheet added between Sheets 34 and 35 would be Sheet 34.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper-right corner of the sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, 4th Revised Sheet 34 cancels 3rd Revised Sheet 34.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.

- D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.
